

Software Developer

Company Profile

Voice Directed Tally Systems, Inc. is a Belleville-based technology company providing an innovative data gathering solution to the Lumber, Forestry and Agriculture industries. We provide enterprise-wide hybrid solutions that result in process improvement and increased workflow efficiency.

Key Responsibilities

- **Software Development:** Design, develop and deploy scalable applications across the full software development lifecycle.
- **Coding & Optimization:** Write clean, maintainable and efficient code. Maintain and optimize code for performance, scalability and security.
- **Collaboration:** Work closely with the Team Lead and development team to define and implement solutions.
- **Testing & Debugging:** Participate in code reviews, write unit tests and troubleshoot software defects to ensure smooth functionality.
- **DevOps - CI/CD:** Collaborate with teams to ensure systems are built and deployed via automated continuous integration and continuous deployment pipelines.
- **Documentation:** Write and maintain comprehensive technical documentation for APIs, systems and processes.

Required Qualifications

- **Education:** Bachelor's degree in Computer Science, Software Engineering or a related field
- **Experience:** 1+ years of proven professional experience. Will consider new grad.
- **Programming Languages:** Proficient in Android, Java, Kotlin, SQL, MySQL, HTML
- **Frameworks:** Hands on experience with modern frameworks; Node.js, React, Spring Boot
- **Tools and Platforms:** Familiarity with cloud platforms

Desirable Qualifications

- Experience with Python, Image Recognition
- Knowledge of the appropriate use of AI in coding

NOTE: This is an on-site position.
